EDUCATION

GGSIP University – Bachelor's in Electronics and Communication Engineering

Udacity – Android Developer Nanodegree
- Learning to create Android Apps that are ready for the Industry

Kendriya Vidyalaya NFC – Senior Secondary Education
- Central Board of Secondary Education - **88%**

August 2013-2017(exp)
New Delhi, India
January 2016-Present
New Delhi, India
April 2011-July 2012
New Delhi, India

PROFESSIONAL EXPERIENCE

Google Summer of Code, FOSSASIA - Android, Java, Firebase, LAMP, Apache
- Designed and developed an Open Sourced template Android App for events
- Set Up an Apache server with a website, which people can use to generate a custom app
- Wrote REST API for the server to be called from a third party service

FOSSASIA - Android, Java, Apache
- Maintaining and developing the Open Event Android App
- Add features critical to an event app
- Mentor new developers to become familiar with the codebase and help them with their queries

YU Televentures - Android, Java, AOSP
- Worked on AOSP bring-up for YU Yuphoria.
- Mentor other interns on building Custom OS for Android devices.

Android/Backend Developer
March 2016- August 2016
New Delhi, India

Android Development Lead
August 2016-Present
New Delhi, India

Technical Intern
August 2015-November 2015
New Delhi, India

TECHNICAL PROJECTS

IVY – IBM Watson Conversation, Javascript, Node, HTML/CSS
- Used IBM Watson to create a chatbot that acts as a personal assistant to you
- Does things like booking flight tickets, ordering food, playing songs, reading news etc

Open Event Android – Android, Java, SQLite, Material Design
- Enable event organizers to create a custom app for their event easily without having any knowledge of android development whatsoever
- Build a standalone website that can create a custom Android app for an Event generated from the FOSSASIA's server just by clicking a button

Stock Hawk – Android, Java, SQLite, Graphs, Android Widget, GCM
- An Android app to monitor stocks backed by a service which runs GCMTask on a timely basis to fetch stock prices and store them into the Database
- Contains features like widget, variation graph, support for visually impaired people, multi language support etc

Material Icon Pack Template – Android, Java, SQLite, Networking
- An Android app that acts as a template for icon pack and wallpaper apps
- Contains functionalities like, ability to apply icons, fetch wallpaper from cloud and send request for unthemed icons
- It also is a full fledged icon pack in itself and consists of more than 3500 custom icons and wallpapers

Popular Movies – Android, Java, Networking, SQLite
- An app that displays details about popular movies by using theMovieDB API
- It allows the user to sort between top rated and popular movies and allows caching of movie details
